

VISION 20/20

THE EYE LIGHT

DCWéditions
PARIS

© Bureau Mine

Our eyes are under increased levels of stress.

5 hours a day, our eyes are glued to screens.

From the age of 30, visual fatigue can appear.

Vision does not tolerate mediocrity.

WITHOUT good lighting:

- _ Eyes are itchy/ stinging**
- _ Reading time reduces**
- _ Headaches appear**

The performance of
Vision 20/20
allows you to:

- 1.** Illuminate your spaces with precision
- 2.** Adjust the light intensity to suit your eyesight
- 3.** Reduce glare from tablets
