

Supersoft

DESIGNED WITH NOTE

SUPERSOFT came about as a response to the preconceptions of what sofas in the Nordics are. A modular sofa designed to be large and welcoming with a level of comfort unlike anything we've ever made before. In short, it's so good you'll find it very very hard to leave it.

SUPERSOFT was created to be used with the Supersolid range of objects, to make it even more useful. Solid oak frame, board materials in back and armrests for shape. Seat and armrests with polyether and wadding, back cushion with down feather mix, and comforell. Removable upholstery in fabric. Legs in oak available in all Fogia standard treatments.

Please note: Combinations with chaise longue and open side require unpatterned or non-directional fabrics.

MATERIAL

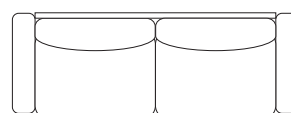

Solid oak frame, board materials in back and armrests for shape. Seat and armrests with polyether and wadding, back cushion with down feather mix, and comforell.
